

WPE Week 2a Lab Activity

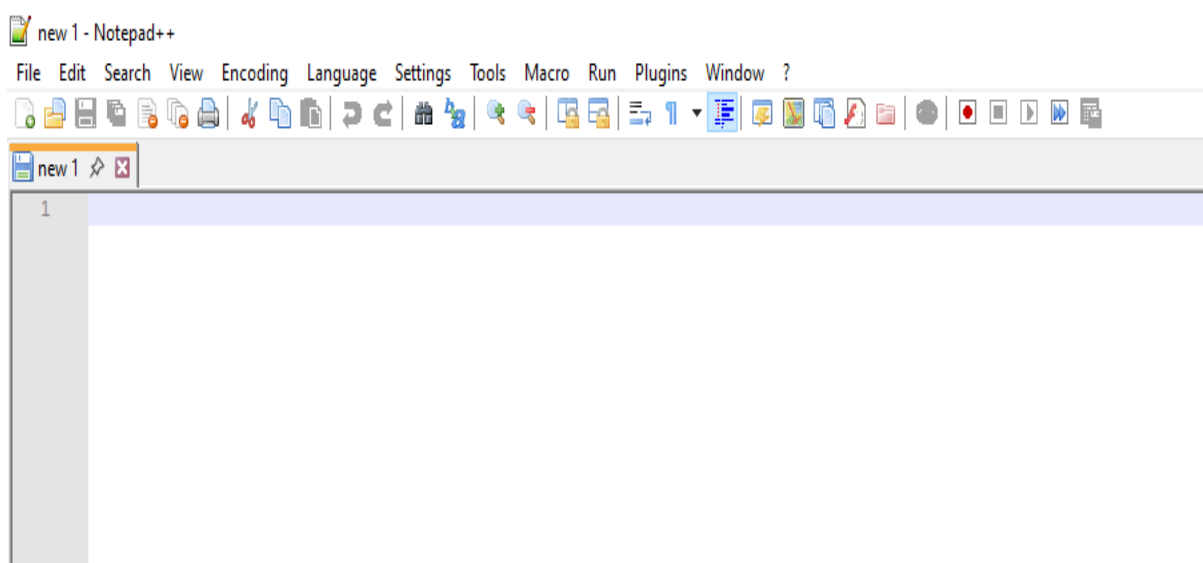

Using the lab computers create a webpage using Notepad++

Step 1: Login to your lab computer.

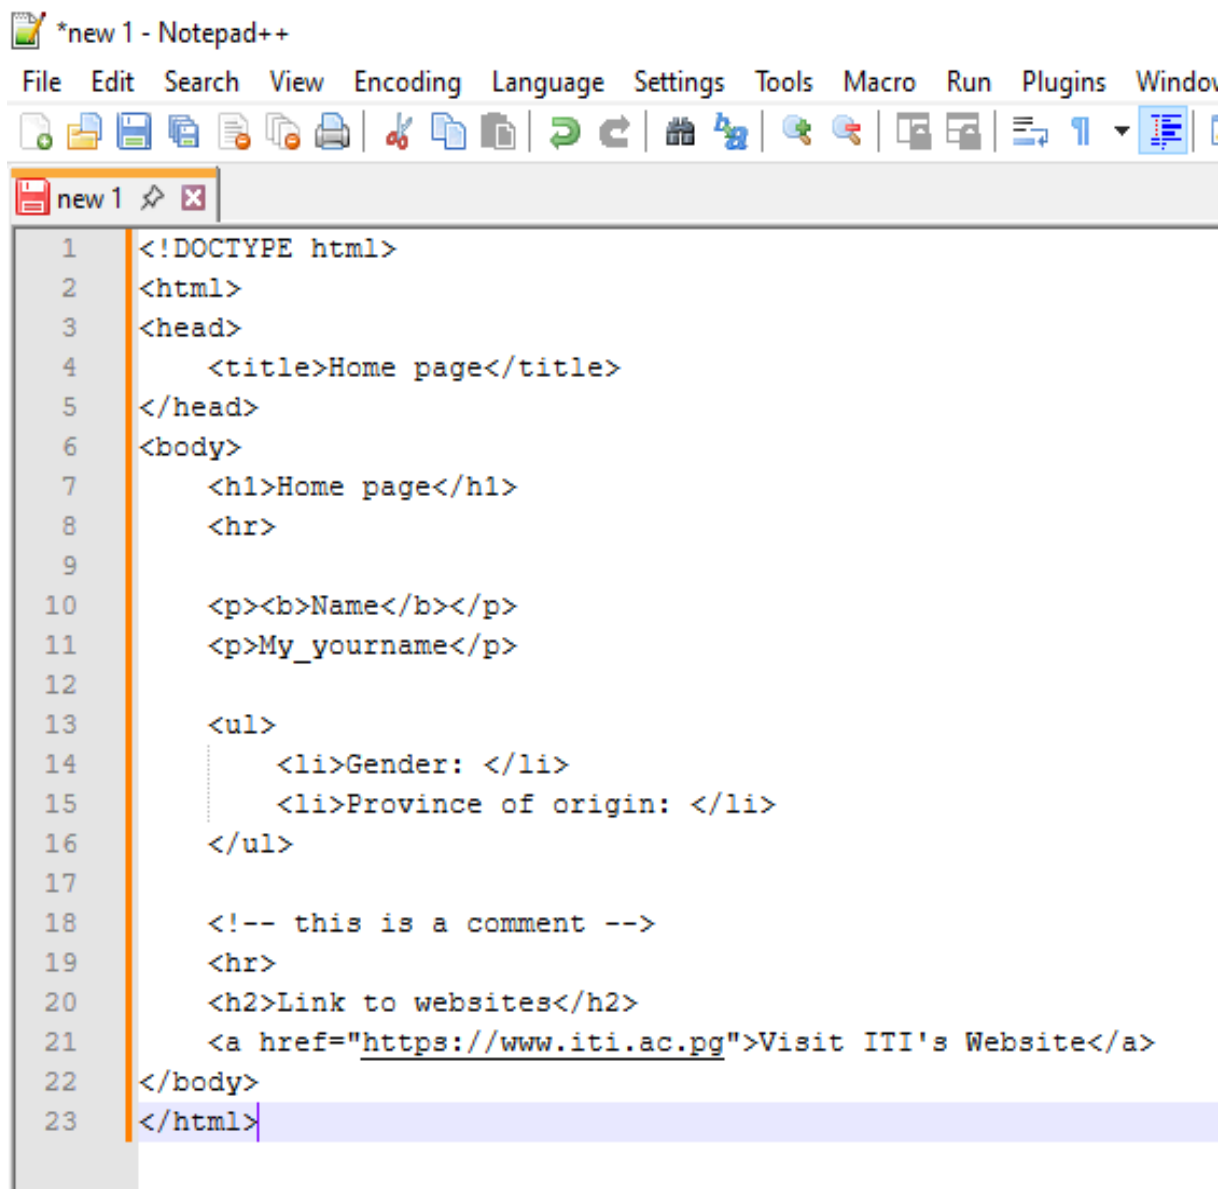

Step 2: Use the Search bar near the windows logo to open a program called Notepad++

Step 3: When notepad++ opens as shown below, type your html tags into the text editor.

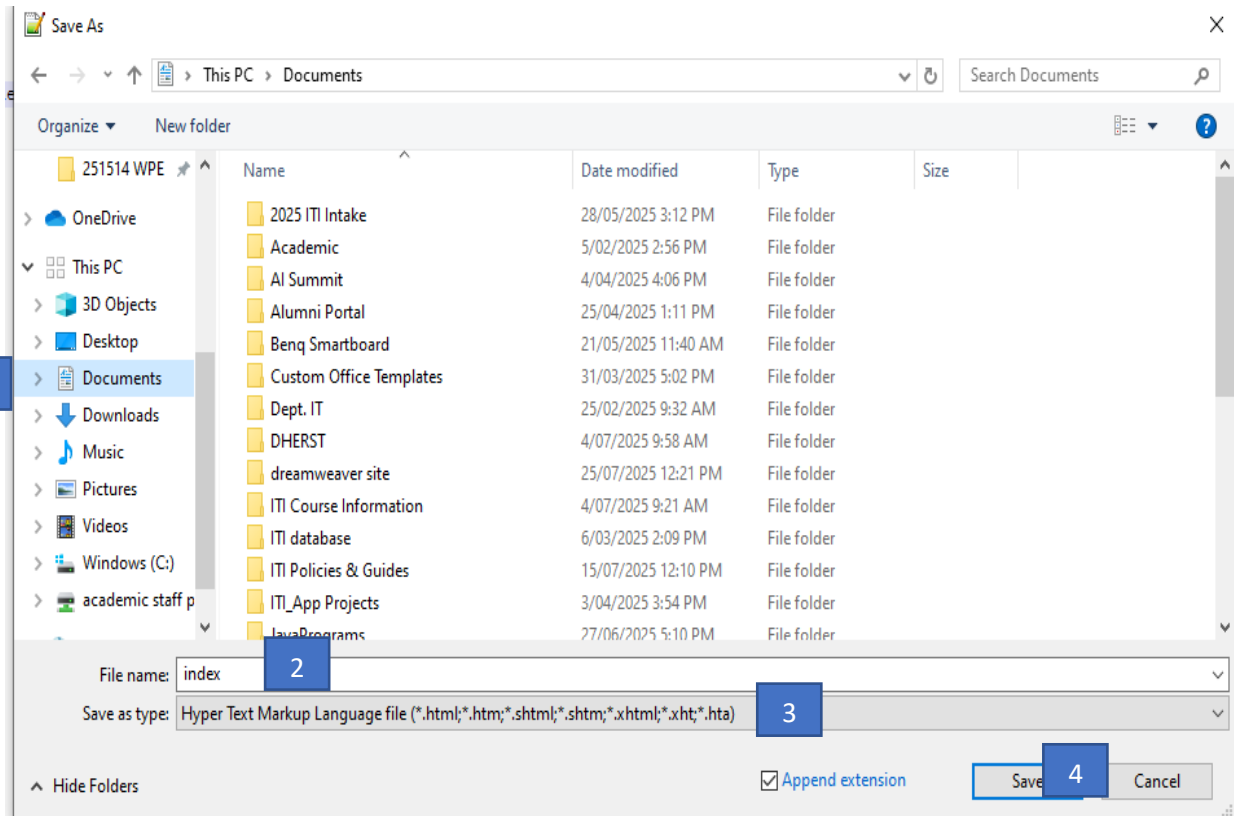

Step 4: Type the following html tags into Notepad++

The screenshot shows the Notepad++ application window titled '*new 1 - Notepad++'. The menu bar includes File, Edit, Search, View, Encoding, Language, Settings, Tools, Macro, Run, Plugins, and Window. The toolbar contains various icons for file operations, editing, and navigation. The editor area displays the following HTML code:

```
1 <!DOCTYPE html>
2 <html>
3 <head>
4     <title>Home page</title>
5 </head>
6 <body>
7     <h1>Home page</h1>
8     <hr>
9
10    <p><b>Name</b></p>
11    <p>My_yourname</p>
12
13    <ul>
14        <li>Gender: </li>
15        <li>Province of origin: </li>
16    </ul>
17
18    <!-- this is a comment -->
19    <hr>
20    <h2>Link to websites</h2>
21    <a href="https://www.iti.ac.pg">Visit ITI's Website</a>
22 </body>
23 </html>
```

Step 5: Go to file/save to save your webpage as index.html. IMPORTANT: webpage in a location where you can access and open it.

1. Pick location where the webpage should be saved. For example: documents
2. Rename file to index
3. Change save as type to Hyper Text Markup Language file
4. Click the save button

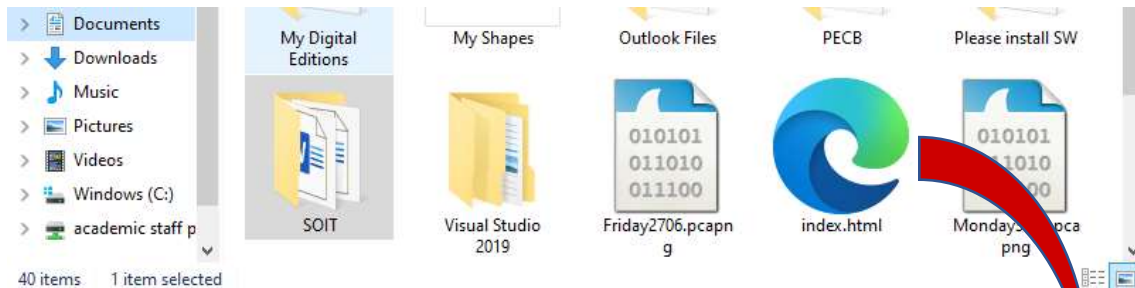

Step 6: After saving, your notepad++ editor should display like this

```

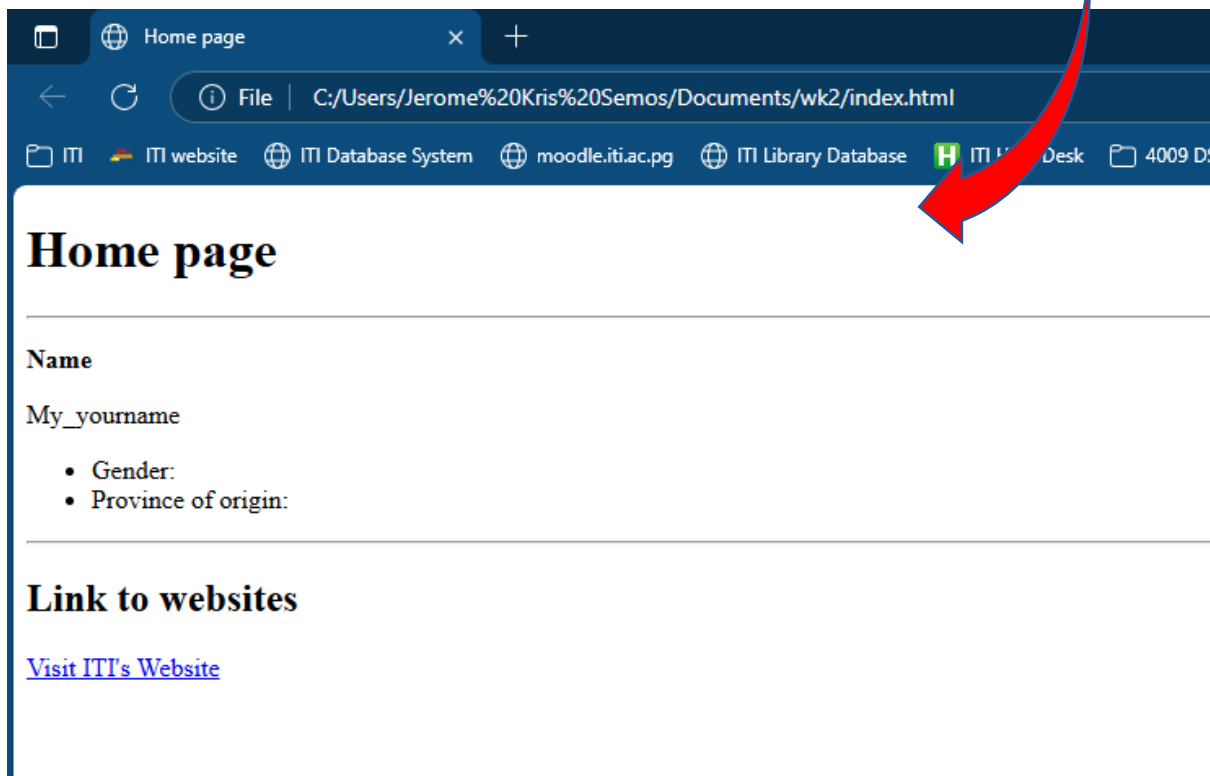

1  <!DOCTYPE html>
2  <html>
3  <head>
4      <title>Home page</title>
5  </head>
6  <body>
7      <h1>Home page</h1>
8      <hr>
9
10     <p><b>Name</b></p>
11     <p>My_yourname</p>
12
13     <ul>
14         <li>Gender: </li>
15         <li>Province of origin: </li>
16     </ul>
17
18     <!-- this is a comment -->
19     <hr>
20     <h2>Link to websites</h2>
21     <a href="https://www.iti.ac.pg">Visit ITI's Website</a>
22 </body>
23 </html>

```

Step 7: Go to where you saved your webpage and open the file on your favourite web browser

Step 8: Your webpage should now appear as shown in the figure below.

Step 9: Visit the website [W3School](https://www.w3schools.com/html/default.asp) - <https://www.w3schools.com/html/default.asp> and implement other tags/html elements in your code.
